

Cybersecurity That Moves Faster Than the Speed of Risk

LogixGuard has you covered.

The health of your business depends on uncompromised security. Threat actors are increasingly savvy at detecting vulnerabilities before you do, and just one successful attack can cost millions of dollars— not to mention your reputation.

But we've got you. LogixGuard MSSP offers 24/7 protection that scales with your business, simplifies compliance, and puts security on lock.

Get to Know LogixGuard MSSP

A Proactive Security Partner

LogixGuard brings together experienced security analysts and AI toolkits to monitor, detect, and respond to threats in real time, all the time.

A 24/7 Threat Intel Engine

LogixGuard never sleeps. Get always-on protection and uninterrupted visibility into vulnerabilities and anomalies across your entire enterprise.

LogixGuard MSSP

As your managed security services provider, the LogixGuard team works as an extension of your information security department. We live and breathe cybersecurity, so you can focus on growth—not risk.

Industry Application Example

Proactively Detected Hidden Access Risk for Utilities Client

Challenge: A remote access port tied to a test subdomain was left exposed and unnoticed by the client's internal tools. Using LogixGuard MSSP, IntelLogix flagged the risk, verified its origin, and escalated it with supporting evidence.

Outcome: The client's security team addressed the issue quickly, reinforcing their trust in IntelLogix as a proactive cybersecurity partner.
